Safety - Quality - Productivity

QUALITY Management Policy Statement

In today's economy, it is critical that our workmanship is dependable so there is not any unplanned operational down time. At Burkes, we realize that our reputation is only as good as our last project. Therefore, we must meet or exceed our customer's expectations each time we perform a project.

Our management team is committed to providing our customers with a quality product. To accomplish this commitment, we make certain to train and test the craftsmanship of our employees to assure they are capable of performing the work. In addition, by utilizing our team of inspectors, we make sure that the work they perform is acceptable.

As a code certified contractor, our basic standards are more stringent. Through annual updates and tri-annual audits, we make sure that our program is up to date with the latest industry standards.

We look forward to providing you with the same degree of quality our current customers have come to expect. If you should ever have any critical or unresolved quality issues with our company, please contact us directly.

Sincerely,
